PROFESSIONAL SUMMARY

Junior Full Stack Engineer with 5+ years of experience in web development, plus hands-on practical experience in electrical and electronics using Arduino Uno. I build projects that solve real needs, and I focus on problem-solving.

SKILLS

- HTML
- CSS3
- JavaScript
- React.js
- Tailwind CSS
- PHP + Laravel
- Arduino (Uno)
- Next.js
- Supabase & Firebase

EXPERIENCE

Backend Developer *January 2025 – Present*

- Started with Next.js and built out projects with databases using Supabase and Firebase.
- Handle backend management for the applications I build.

Electrical & Electronics *September 2022 – 2023*

- Self-taught, hands-on practical work with Arduino (Uno) and other boards.
- Worked on projects aimed at a better future.

Frontend Developer *November 2021 – June 2022*

- Worked with React.js, Tailwind CSS, and Bootstrap to build clean, well-designed interfaces.

WordPress Developer *January 2019 – February 2020*

- Started with WordPress and built out sites using many themes and plugins.

EDUCATION

Bachelor of Science (BEng) in Computer Science *In progress*
